
La columna C es la principal, ya que es en la que se recogen todos los datos posibles de Individuals en Beacon
Desde OMOP a Beacon
Desde OMOP a Beacon y de Beacon a Phenopackets
En estos casos la conversion se da en ambos sentidos de bff a pxf como de pxf a bff
Desde OMOP a Beacon/Phenopackets(a apartados extra )
Desde Beacon a Phenopackets
casos de conversion de pxf a bff
